Low slot, true to slot Reference: Four-seam

Low slot (25°) with a four-seam that sits true to the slot (0°), spun fairly cleanly (97% efficient), with average spin for its velocity (25 BU).

Arsenal Movement

Averages with one-standard-deviation ovals. Drawn from behind the pitcher: arm side is to the right.

Confidence and Data Notes

Stuff+ is Spin ID's own model, not FanGraphs Stuff+. 100 is the 2021–2024 average pitch. Ceiling: what this pitcher's comps do with each pitch, at this pitcher's own velocity and release; Gap is Ceiling minus today; the lever is the change that adds the most. Fastballs keep their natural spin.

Confidence (● High, ◐ Medium, ○ Low) is how much real MLB data sits behind each estimate. Estimates, not promises.

Validity test T5 passed: Stuff+ in 2025 lined up with 2026 results at r = 0.21, better than velocity alone (0.09) and 2025 results (0.09), over 1,247 pitches.

Tested (T4, 2025 to 2026): bigger gaps came with only slightly bigger next-season Stuff+ gains (partial r 0.07; the range includes zero), so treat a gap as a direction to explore, not a forecast.

2025 season: 2,794 pitches with a pitch type; the Spin ID comes from 1,404 four-seams. Comps are the nearest Spin IDs (slot, efficiency, tilt offset, spin) among MLB pitcher-seasons 2021–2025.
