High slot, true to slot Reference: Four-seam

High slot (51°) with a four-seam that sits true to the slot (−2°), spun with typical efficiency (90% efficient), with above-average spin for its velocity (25 BU).

Arsenal Movement

Averages with one-standard-deviation ovals. Drawn from behind the pitcher: a left-hander's arm side is to the left.

Top Recommendations

- ● Four-seam: Ceiling 101, now 91 (gap +10). The best reachable shape is 19.0 in IVB and 9.0 in arm side. Main lever: grip / seam orientation. The seam effect is in the 40th percentile of comps who throw it. Confidence: High (25 comps).
- ● Curveball: Ceiling 97, now 88 (gap +9). The best reachable shape is −14.0 in IVB and 11.0 in glove side. Main lever: spin efficiency. Confidence: High (16 comps).
- ◐ Cutter: Ceiling 118, now 105 (gap +13). The best reachable shape is 7.0 in IVB and 10.0 in glove side. Main lever: grip / seam orientation. The seam effect is in the 50th percentile of comps who throw it. Confidence: Medium (10 comps).

Velocity in mph, spin in rpm, movement in inches (IVB: induced vertical break; HB: horizontal break from behind the pitcher, so a left-hander's arm side is negative).

Confidence and Data Notes

Stuff+ is Spin ID's own model, not FanGraphs Stuff+. 100 is the 2021–2024 average pitch. Ceiling: what this pitcher's comps do with each pitch, at this pitcher's own velocity and release; Gap is Ceiling minus today; the lever is the change that adds the most. Fastballs keep their natural spin.

Confidence (● High, ◐ Medium, ○ Low) is how much real MLB data sits behind each estimate. Estimates, not promises.

Validity test T5 passed: Stuff+ in 2025 lined up with 2026 results at r = 0.21, better than velocity alone (0.09) and 2025 results (0.09), over 1,247 pitches.

Tested (T4, 2025 to 2026): bigger gaps came with only slightly bigger next-season Stuff+ gains (partial r 0.07; the range includes zero), so treat a gap as a direction to explore, not a forecast.

2026 season: 2,858 pitches with a pitch type; the Spin ID comes from 1,275 four-seams. Comps are the nearest Spin IDs (slot, efficiency, tilt offset, spin) among MLB pitcher-seasons 2021–2026.
